**Subject:** Draft comments

Dear Committee,

Thank you for the opportunity to comment on the draft. First I want to acknowledge the committee for the hours of work to establish the evidence. I know full well how tedious this task can be.

My comments:

- Line # 307 ultra sound guidance category 1 B seems not strong enough.
- If available, is too tentative and does not encourage the skill development and use of technology that improves patient outcomes.
- I also agree that specialized IV teams is now a Category 1 A
